Strategies for Supporting Children with Complex Communication Needs

Understanding Complex Communication Needs

An introduction to supporting children with limited to no speech. Learn more about recognising and responding to children experiencing impacts on their communication, creating an inclusive communication environment, and working in collaboration with allied health professionals to best support each child's unique development.

Tuesday 18th February 2025 | 10am - 11am

Strategies to support children who use Augmentative and Alternative Communication (AAC)*

Does your service have an enrolled child who is non-speaking, uses a communication device, or has other Complex Communication Needs? In this session we will explore strategies to support the meaningful inclusion of children who require communication aids such as visual symbols and personal communication devices. Join us to hear about what makes an accessible communication environment, strategies to support children's developing communication skills, and ways to increase your confidence in supporting children with Complex Communication Needs.
